

The Westermann range of machinery makes your routine tasks easier, quicker, and more cost effective.

The Radial Sweeper range is designed to remove debris, moss and weeds without the use of chemicals. Radial brushing is an alternative solution to the use of pressure washers or time consuming manual clearance.

The Ride-On range of products offer everything for large scale cleaning and farm maintenance, with options for battery power, petrol or diesel. The interchangeable heads on many of the machines make the range extremely versatile and multi-use.

All machines are manufactured in Meppen, Germany and are distributed in 40 countries worldwide.

Chemical-free weed and moss removal

Yard cleaning and grain shed sweeping

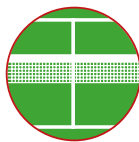

Pavement and street cleaning

Barn hygiene and animal feed sweeping

Winter control

Sports facility maintenance

WHICH WESTERMANN DO YOU NEED?

WR 870
Moss Brush
(Page 6)

APPLICATION

Moss removal / sweeping / snow clearance

SURFACES

Indoors: warehouse hard floors / concrete

CMA and WS
Scrapers
(Page 26)

APPLICATION

Scraping of farm waste

SURFACES

All hard surfaces / stable matting

WR870 MOSS BRUSH

This is the go-to machine for chemical free moss removal, powered by Honda. Suited to commercial and domestic applications, this is a fast and efficient solution. It will renovate up to 100m² in one hour. Space saving fold down handles allow transport by small car or van.

Clockwise and anti-clockwise brush rotation removes thick moss from the cracks and crevices without the use of environmentally damaging chemicals. Available with easily interchangeable brush options for delicate surfaces, sweeping, or snow clearing.

Wire brush wear is approximately 3000-5000m² per brush (see page 8 for alternative brushes).

This machine will remove some light weeds, but for complete weed removal see the WKB660 Weed Ripper (page 12).

KEY FEATURES

- 4-stroke Honda engine, two options available
- 1 year machine warranty
- Clockwise and anti-clockwise brush rotation
- Adjustable brush height
- Interchangeable brush heads (page 10)
- Handlebars fold down for transit or storage
- Deadman handle
- Galvanised chassis

WR 870 / WR650 BATTERY SWEEPERS

The WR870 Battery, and the smaller WR650 Battery are ideal for clearing debris, leaves and snow.

This is a quick and easy solution to keep your stable, yard, driveway, or livestock areas clean.

Quiet battery operation makes this model suitable for areas with low noise requirements.

KEY FEATURES

- 12V battery and DC motor
- 1 year machine warranty
- Clockwise and anti-clockwise brush rotation
- Handlebars fold down for transit or storage
- Galvanised chassis

WKB660 WEED RIPPER

The WKB 660 is the choice for landscapers and contractors who need a machine to deal with a variety of problems.

- Removes overgrown weeds and moss from all hard surfaces
- Removes weed growth from wall bottoms/kerbs
- Redefines pathways by cutting back overgrown grass or soil
- Suitable for uneven surfaces such as cobbles or stone setts

Brush wear is approximately 700m² per set.

KEY FEATURES

- 4-stroke Honda GXV 160 OHV Engine
- 1 year machine warranty, 3 year engine warranty
- 12 x rotating brushes
- 3 full sets of brushes included
- Handlebars fold down for transit or storage
- Deadman handle
- Detachable guard with side flap for edge work
- Galvanised chassis

CM2 RIDE-ON HYDROSTATIC

A fast and economical solution for farm cleaning tasks, such as pushing animal feed back, scraping waste, and snow clearance.

This basic model features hydrostatic drive powered by either a Honda GXV160 (recoil start) or GXV390 (electric start) engine. Forwards and reverse drive is engaged using the right foot pedal. All accessories on this model are mechanically operated.

All CM2 models feature a long range fuel tank, hour counter, and rear towing plate as standard. 53kg counter weights are supplied with the machine - extra weights are available.

KEY FEATURES

- Honda engine (GXV160 or GXV390)
- 1 year machine warranty, 3 year engine warranty
- Hydrostatic drive
- Zero turn, 3 wheel, front wheel drive
- Galvanised chassis
- Mechanical accessories (no hydraulics to the accessories)

CM2 RIDE-ON HYDROSTATIC WITH HYDRAULIC

The CM2 Hydrostatic with Hydraulic further enhances the tasks possible with a single power unit. In addition to pushing and scraping, the powerful hydraulics can power a range of accessories for cleaning, moss removal, weed ripping, yard maintenance, and hygiene. Forward and reverse drive is engaged using the right foot pedal. Accessories on this model are hydraulically operated; some accessories require extra hydraulic options.

All CM2 models feature a long range fuel tank, hour counter, and rear towing plate as standard.

100kg counter weights are supplied with the machine - extra weights are available.

KEY FEATURES

- Honda GXV390 or Briggs & Stratton Vanguard engine
- 1 year machine warranty, 3 year engine warranty
- Hydrostatic drive
- 12+ interchangeable accessories
- Hydraulic accessories 13 l/min (18 l/min with Big option)
- Galvanised chassis
- Zero turn, 3 wheel, front wheel drive
- Quick release of attachments

CM2 RIDE-ON PRO

The CM2 PRO has been designed to perform year after year in commercial environments. Powered by the more powerful Briggs & Stratton 16hp Vanguard engine, the PRO is engineered to ensure maximum performance and minimum operator fatigue.

Hydraulic lifting and 18 litre/minute hydraulics are included as standard. Two-way hydraulics allow downward pressure to be altered according to the severity of the task. An additional 'floating position' ensures ground contours can be followed.

All CM2 models feature a long-range fuel tank, hour counter, and rear towing plate as standard.

KEY FEATURES

- Briggs & Stratton Vanguard 2 Cylinder engine
- 1 year machine warranty, 3 year engine warranty
- Hydrostatic drive
- 12+ interchangeable accessories
- Big hydraulics 18 l/min
- Hydraulic Lifting of attachments
- Galvanised Chassis
- Zero turn, 3 wheel, front wheel drive
- Quick change lever for accessories

CM2 RIDE-ON ELECTRIC

The CM2 Electric is the quiet answer to your cleaning tasks. It is ideal for noise sensitive environments and indoor use, with zero-exhaust emissions.

Forward and reverse drive is engaged using the right foot pedal. All accessories on this model are mechanically operated. Top speeds of 8 km/h forwards, 5 km/h backwards.

53kg counter weights are supplied with the machine - extra weights are available.

KEY FEATURES

- Quiet and emission-free
- 120 minutes of use per charge
- 8 hour charge time
- Driven by 4 x 12V, 80Ah batteries
- Zero turn
- Galvanised chassis
- Quick change lever for attachments

WHY WESTERMANN?

PROBLEM SOLVING ENGINEERING

All products are designed and manufactured by Westermann in Meppen Germany. Only the best quality power units are used, Honda or Briggs & Stratton Vanguard.

From the first radial brush in 1989, Alfons Westermann and his team have developed a range of machinery that is functional, versatile and economical. The company's success has been the result of understanding customer problems and designing machines that solve them.

LOCAL DEALERS

An international network of dealers and distributors provides full service and support in 40 countries.

All machines are designed with replaceable components for easy servicing, with spare parts stocked at all times.

EXCELLENT AFTER SALES

When you purchase a Westermann you are buying a quality product with first class after care.

Westermann and their dealer network will support you throughout the lifespan of your machine.

iDVERDE

The largest landscape contractor in Europe uses the Westermann range to control moss and weed growth on their large portfolio of contracts.

The low vibration levels, portability and value for money were very important to *idverde*, as well as the machines' exceptional performance.

BROMFORD HOUSING ASSOCIATION

Bromford Housing Association use a fleet of Westermann Moss Brushes, plus a CM2 with 1000mm wire brush to control moss and weed growth on their extensive housing portfolio.

Mindful of the environmental issues surrounding chemical use, BHA decided to go the Westermann route which has proved to be efficient and environmentally friendly.

MILTON KEYNES COUNCIL

Milton Keynes Council took delivery of a CM2 PRO and all sweeping, weed brush, and snow clearance attachments.

The machines are used extensively in sensitive areas that require a no chemical approach to grounds maintenance.

VERDEGO - WAYNE JENNER

As an owner operator, Wayne Jenner of Verdego has chosen Westermann machinery to renovate and clear his customers forecourts, drives, and paths.

The combination of the WR870, WKB660 and Ride-On CM2 ensures that Wayne can tackle anything his customers require.

Your Westermann distributor:
